EVERHARD
SURFACE WATER DRAINAGE

A fully integrated surface water drainage solution for your home

SELECTING THE SYSTEM THAT'S RIGHT FOR YOU

EasyDRAIN™ COMPACT

EasyDRAIN™

Flo-way™ / Rainwater

HANDY HINT

For swimming pools we recommend polymer or EURODESIGN 316 stainless steel grates

Our fully integrated surface water drainage system is light-weight with click-together technology and moulded outlets to make installation quick and easy. Our products are injection moulded right here in Australia and are made from tough, recycled, UV stabilised polymer.

When you see this colour on our products, you know it's EasyDRAIN™ COMPACT!

When you see this colour on our products, you know it's EasyDRAIN™!

When you see this colour on our products, you know it's Flo-way™ / Rainwater!

APPLICATION GUIDE

AREA

- Exterior patios
- Paved terraces
- Car parks
- Driveways
- Walkways
- Playgrounds
- Swimming pools

WATER FLOW

LOW MEDIUM HIGH

The number of connecting pipes can affect water flow. Refer to page 13 for tips on water flow.

RAINFALL

For swimming pools we recommend polymer or EURODESIGN 316 stainless steel grates. Galvanised grates are not suitable for swimming pools or environments affected by salt water

EasyDRAIN™ COMPACT

- 80mm profile makes for easy installation and is suitable for areas with low rainfall and water flow
- Available in 3m pre-joined lengths for larger areas
- Comes complete with heel-friendly grates. Available in black polymer or galvanised steel
- Ideal for small outdoor areas and around swimming pools

EasyDRAIN™

- 100mm profile is suitable for high rainwater levels and water flow
- Available in 3m pre-joined lengths for larger areas
- Comes complete with a range of galvanised steel, stainless steel and polymer grate options - See Grate Guide for complete list
- Ideal for driveways, gardens and large outdoor areas

All variations of Channel and Grate are sold as complete unit. Grates not sold separately

THE COMPLETE
SURFACE WATER DRAINAGE SYSTEM

EasyDRAIN™ is a fully integrated surface water drainage solution for your home, available in 100mm or 80mm profile

- ✓ EasyDRAIN™ comes complete with various grate options
- ✓ 1 metre lengths easily join together and with other components by simply clicking together
- ✓ Black polymer grate and channel made from tough, recycled UV stabilised polymer
- ✓ Comes in 100mm profile to capture larger volume of water flow or 80mm profile for easy installation
- ✓ 200mm paver-length segments moulded into channel allows for easy cutting and rejoining with use of a converter
- ✓ Connects to 75mm, 90mm and 100mm pvc pipe
- ✓ Anti-flotation design eliminates the need for reinforcement
- ✓ Polymer is ideal for swimming pools and coastal areas affected by salt water and is 100% Australian Made

Visit everhard.com.au/install to view the EasyDRAIN™ installation video

NEW
Now offering the complete Compact Drainage System Range

Pictured: 83500

A GUIDE TO EasyDRAIN™ COMPACT

Specifications, Features and Benefits

Our EasyDRAIN™ COMPACT system is the only complete system in the market with a shallow 80mm profile, making it ideal for low rainfall and low water flow areas

COMPACT CHANNEL & GRATE
Available in 1m and 3m lengths. Collects and distributes water away from areas around the home

- Comes standard with heel friendly grate options in black polymer and galvanised steel
- Comes in 1 metre and 3 metre lengths that easily join together and with other components by simply clicking together
- Black polymer grate and channel made from tough, recycled UV stabilised polymer - ideal around swimming pools and in coastal areas

- Shallow 80mm profile allows for quick installation - ideal for low rainfall areas
- 200mm paver-length segments moulded into channel, allowing for easy cutting and rejoining with converter
- Connects to 75mm, 90mm and 100mm pvc pipe

COMPACT TEE PIECE
Allows for an easy change of direction. Connects to the EasyDRAIN™ Compact Channel

COMPACT CORNER
Allows for an easy change of direction. Connects to the EasyDRAIN™ Compact Channel

COMPACT END CAP
Provides a finishing point at the end of the EasyDRAIN™ Compact Channel

COMPACT CONVERTER
Acts as a joiner between cut ends of EasyDRAIN™ Compact Channel by converting a male end into a female end

HANDY HINT
Galvanised grates are not suitable around swimming pools or environments affected by salt water

Note: All measurements are in millimeters. Dimensions may vary due to the nature of polymer

NEW

EasyDRAIN™ Compact Black Polymer Slim Pit with Black Polymer Grate
Product code: 83540
Weight (kg): 1.07

Also available with Pressed Galvanised Steel Grate | Product Code: 83540G

NEW

EasyDRAIN™ Compact Black Polymer Tee Piece with Black Polymer Grate
Product code: 83550
Weight (kg): 0.32

Also available with Pressed Galvanised Steel Grate | Product Code: 83550G

EasyDRAIN™ Compact Black Polymer Channel with Black Polymer Grate - 1 metre + 3 metre
Product codes: 1M 83500 | 3M 83530
Weight (kg): 1M 1.70 | 3M 5.05

1M also available with Pressed Galvanised Steel Grate | Product Code: 83501

EasyDRAIN™ Compact Black Polymer Corner with Black Polymer Grate
Product code: 83600
Weight (kg): 0.31

Also available with Pressed Galvanised Steel Grate | Product Code: 83601

EasyDRAIN™ Compact Black Polymer End Cap for Channel and Grate
Product code: 83700
Weight (kg): 0.03

EasyDRAIN™ Compact Black Polymer Converter for Channel and Grate
Product code: 83701
Weight (kg): 0.01

Refer to Page 3 for Pressed Galvanised Steel grate. Refer to page 14 for all product and grate variations

NEW

Our EasyDRAIN™ Leaf Dome fits both the EasyDRAIN™ Range and the EasyDRAIN™ Compact Range. See next page for details.

HANDY HINT
 You'll need a converter to connect two male channel ends together or connect a corner to a male end of channel

Pictured: 83300

A GUIDE TO EasyDRAIN™

Specifications, Features and Benefits

Our EasyDRAIN™ channel and grate system provides everything you need to create an effective, fully integrated surface water drainage system. We offer a range of accessories and materials to suit any DIY project

CHANNEL & GRATE

Available in 1m and 3m lengths. Collects and distributes water away from areas around the home

- Comes standard with a range of grate options in Polymer, Galvanised Steel and Stainless Steel
- Comes in 1 metre and 3 metre lengths. Easily join together and with other components by simply clicking together
- 100mm profile to capture larger volume of water flow - ideal for heavy rainfall areas

- 200mm paver-length segments moulded into channel, allowing for easy cutting and rejoining with converter
- Black polymer channel and grate made from tough, recycled UV stabilised polymer - ideal for driveways and large outdoor areas
- Connects to 75mm, 90mm and 100mm pvc pipe

SLIM PIT
 Allows seamless connection to 75mm, 90mm and 100mm pvc stormwater pipe. Connects to the EasyDRAIN™ Channel

TEE PIECE
 Allows for easy change of direction. Connects to the EasyDRAIN™ Channel

CORNER
 Allows for easy change of direction. Connects to the EasyDRAIN™ Channel

END CAP
 Provides a finishing point at the end of the EasyDRAIN™ Channel. Also allows for stormwater connection at the end of the EasyDRAIN™ Channel

LEAF DOME
 Provides a barrier against leaves and other debris from entering waterways. Suitable for both EasyDRAIN™ and EasyDRAIN™ Compact ranges

CONVERTER
 Acts as a joiner between cut ends of EasyDRAIN™ channel by converting a male end into a female end

Note: All measurements are in millimeters. Dimensions may vary due to the nature of polymer

EasyDRAIN™ Black Polymer Channel with Black Polymer Grate - 1 metre and 3 metre
 Product codes: 1M 83300 | 3M 83390
 Weight (kg): 1M 2.70 | 3M 7.90

1M and 3M available with a range of grate options. Refer to page 14 for product variations

EasyDRAIN™ Black Polymer Slim Pit with Black Polymer Grate
 Product code: 83800
 Weight (kg): 1.11

Available with a range of grate options. Refer to page 14 for product variations

EasyDRAIN™ Black Polymer Corner with Black Polymer Grate
 Product code: 83330
 Weight (kg): 0.54

Available with a range of grate options. Refer to page 14 for product variations

EasyDRAIN™ Black Polymer Tee Piece with Black Polymer Grate
 Product code: 83400
 Weight (kg): 0.66

Available with a range of grate options. Refer to page 14 for product variations

EasyDRAIN™ Black Polymer End Cap for Channel and Grate
 Product code: 83360
 Weight (kg): 0.06

EasyDRAIN™ Black Polymer Leaf Dome for Channel and Grate
 Product code: 84040
 Weight (kg): 0.02

EasyDRAIN™ Black Polymer Converter for Channel and Grate
 Product code: 83370
 Weight (kg): 0.03

Refer to page 14 for all product and grate variations

For a commercial drainage solution view our range of TechnoDRAIN

TechnoDRAIN is an ideal surface water drainage solution for driveways and parking lots that support areas of vehicle traffic up to Class D

HANDY HINT
Where rainwater pits are connecting to a stormwater pipe, we recommend using a Pit Boss for seamless connection

A GUIDE TO Flo-way™ / Rainwater Pits & Grates

Specifications, Features and Benefits

Our Flo-way™ / Rainwater Pits and Grates are designed to integrate with the EasyDRAIN™ range. It is an innovative and simple approach to solving your drainage problems

PIT GRATES
Sits on top of a Rainwater Pit or Flo-way™ Pit to allow water to drain into pit. Grates can be purchased complete with Flo-way™ Pit or separately for Rainwater Pit

LEAF BASKET
Fits Rainwater Pit and assists flow of surface water by providing a barrier against leaves and other debris entering the waterways

FLO-WAY™ PIT
Square trap design funnels rainwater directly into a connected stormwater pipe. Suits 90mm or 100mm PVC pipe

PIT BOSS
Creates a pipe connection to pits, reducing issues caused by subsidence of the ground or improper installation connections. Assists in maintaining the fall of the pipework into the pit

RAINWATER PIT
Designed as a drainage collection point by itself or for connection to the EasyDRAIN™ Channel and Grate system

HANDY HINT
The Pit Boss is angled to meet the angle of the pit being installed, to maintain the fall of the pipework

Note: All measurements are in millimeters. Dimensions may vary due to the nature of polymer

Flo-way™ Shallow with Black Polymer Grate
Product code: 84812
Weight (kg) 0.50

EasyDRAIN™ Rainwater Pit with Black Polymer Grate
Product code: 84767
Weight (kg) 1.10

Pit Boss to suit EasyDRAIN™ Rainwater Pit
Product code: 80080
Weight (kg) 0.60

Leaf Basket to suit EasyDRAIN™ Rainwater Pit
Product code: 84041
Weight (kg) 1.00

Refer to page 15 for all product and grate variations

Features and Benefits

- ✓ The Flo-way™ Pit square trap design funnels rainwater directly into a connected stormwater pipe
- ✓ Flo-way™ Pits come complete with grate, available in a range of colours
- ✓ Rainwater Pits are designed as a drainage collection point by itself or for connection to the EasyDRAIN™ Channel and Grate System
- ✓ Rainwater Pits and Grates come separately or complete with black polymer or aluminium grate
- ✓ Easy to install into any domestic or non trafficable application
- ✓ Suits 90mm or 100mm PVC Pipe
- ✓ Made from UV stabilised polymer material
- ✓ Black polymer is made from 100% recycled plastic
- ✓ 100% Australian made

Flo-way™ Grates

For a commercial stormwater solution view our range of Stormwater Pits and Grates

- ✓ Made from durable, UV resistant polypropylene
- ✓ Ideal for trafficable areas
- ✓ Easy to handle and install
- ✓ Comply with Australian Standards
- ✓ Come with a range of grates
- ✓ Pits are 100% Australian Made

CONNECTION INSTRUCTIONS

HOW EASYDRAIN™ CONNECTS TOGETHER

EasyDRAIN™ uses a click-together male to female interlocking system. To prevent seepage at joints, use a suitable silicon.

Cutting and Connecting Channel and Grate:

- Remove grate from channel and flip channel over
- Use a saw to cut between the ribs that are 200mm from the female end. Refer to Figure 1
- Trim the ends with a utility knife so that the ribs are neat and all excess plastic is removed
- Place grate back into cut channel and mark the cut area ensuring the grate is positioned correctly in channel
- Remove grate and cut using a cutting disk for a neat edge
- Connect the male and female ends together by pushing the male end down into the female end until it 'clicks' into place

Figure 1

Connecting Converter:

Use the Converter when connecting two male ends together or to convert a male end to a female end of channel.

- Flip both lengths of channel over and position ends together
- Click converter into place and seal with silicone

Connecting Slim Pit:

Use a Slim Pit to connect EasyDRAIN™ to a stormwater pipe located at a side angle to drainage.

- Slim Pit has all female ends so you will need to ensure you connect to a male end of channel

* Refer to compact variations for Compact Slim Pit

Connecting Corner and Tee:

Use the Corner and Tee to change direction of your channel.

- Corner Piece has all male ends so you will need to use a converter when connecting to a male end of channel

- Tee Piece has all female ends so you will need to ensure you connect to a male end of the channel

- Tee Piece and Corner Piece will connect to each other without the need for a converter

* Refer to compact variations for Compact Tee and Corner

Connecting End Cap:

Use an End Cap to create an end point for your drainage system and seal with silicone.

- You can also use an End Cap to connect to a stormwater pipe and / or leaf dome by cutting out the required sized hole
- Connect your End Cap to a female end of channel or a male end using a converter

Connecting Leaf Dome:

Use a Leaf Dome to prevent leaves and other debris from entering the stormwater system.

- Install Leaf Dome at the entry point of your stormwater outlet in the bottom of your channel, Slim Pit or at the end of the channel using an End Cap
- Cut the required sized hole in the centre of the outlet inside of the circular moulded edge and seal using silicone

COMPACT VARIATIONS

Connecting Compact Slim Pit:

- When connecting Compact Channel to a Compact Slim Pit, first trim the locking tabs off each side of the male end of channel. Refer to Figure 2

NOTE: If you have cut the channel to size there will be no locking tabs present on the channel

- Locate the lever of the connector at the opening of the Compact Slim Pit and pull upwards towards the grate until it clicks out of place. Refer to Figure 3

- Position the male end of the channel into the top of the connector so the lip of the channel slots into the ribs of the lever and push down until it clicks back into place. Refer to Figure 4

Figure 2

Figure 3

Figure 4

Connecting Compact Corner:

- Compact Corner Piece has all female ends so you will need to ensure you connect to a male end of channel

NOTE: You cannot connect a Compact Corner directly to a Compact Slim Pit. You will need to use a section of cut channel between a Compact Corner and Compact Slim Pit, ensuring you have a male end for connection to the Compact Slim Pit

Connecting Compact Tee:

- Compact Tee has all male ends so you will need to use a Compact Converter when connecting to a male end of channel

- Compact Tee will connect directly into a Compact Slim Pit, a Compact Corner or female end of channel

INSTALLATION INSTRUCTIONS

1.

PREPARE

- ✓ Dig your trench 50mm deeper and wider than the channel being installed and not less than 75mm wider than the width of the channel at its lip
- ✓ Slope the trench at a ratio of 1cm for every 1m of channel
- ✓ Pour concrete slurry in the base of the trench
- ✓ Use a string line to ensure straightness and the correct finish height

2.

INSTALL

- ✓ Grates must be locked into channel prior to installation and it is recommended that you connect sections together before placing in trench
- ✓ Connect your EasyDRAIN™ Channel and Grate with other elements to complete your drainage system, ensuring to connect End Cap to the highest point of your channel
- ✓ To connect to a PVC pipe, cut a hole in the base of the Channel, Slim Pit or End Cap as required, guided by the outlet collar and seal with silicone
- ✓ Place drainage into trench and push the channel into the concrete slurry so the feet of the channel are completely immersed

3.

FINISH

- ✓ Place suitable expansion material such as a closed cell foam along the top edge of the channel running the entire length of channel, approximately 75mm wide and 10mm thick, then attach to channel with adhesive tape. This will assist with the removal of the grate when required
- ✓ Pour concrete down each side of the channel, ensuring the base is completely immersed
- ✓ Lightly compact and finish the concrete approximately 2-3mm above the surface level of the grate to promote run off from surrounding area into drain

INSTALLATION TIPS

WATER FLOW

When determining water flow you will need to consider the following variables that may increase the volume of water flowing into your drainage system: the type of soil; the slope of the land; the size of the stormwater pipes; and the number of stormwater pipe connections.

REMOVING GRATES

For cleaning and maintenance purposes, grates can only be removed if they have been installed using a suitable expansion material. To remove grate, place the tip of a screw-driver into the flange, where the grate and channel connect. Gently push the edge of the channel outwards until the grate pops out. Repeat this for each flange along the channel.

PRE-EXISTING CONCRETE

If installing EasyDRAIN™ against pre-existing concrete or pavers, it is recommended that you 1. Dig your trench with enough room for drainage plus an additional 15-20mm below surface level 2. Pour concrete into the base of the trench and place in EasyDRAIN™ Channel and Grate 3. Push the channel and grate down into the concrete, allowing for excess concrete to push up the side of the channel away from the existing concrete.

TRAFFICABLE AREAS

If you are installing your EasyDRAIN™ system in an area that may receive some vehicle traffic such as a driveway, you will need to ensure that you install your channel in concrete. For driveways, we recommend our range of polymer grates. Refer to installation instructions above.

PLEASE NOTE: All EasyDRAIN™ Grates are Class A only. For drainage systems that support up to Class D traffic, view our TechnoDRAIN range at everhard.com.au

PRODUCT VARIATION INFORMATION
